Problem ECS will interface with LPGS to support Level 1 product generation. In this support role, ECS will receive user orders and relay these requests to the LPGS. The LPGS will order the requisite Level OR data from ECS. ECS will retrieve the LOR data from its archive and return these data to LPGS. Using these LOR data, LPGS will create the Level 1 products ordered by the user, and provide these products to ECS. ECS will distribute the Level 1 products to the user. A new ICD is needed to define this interface.			
Proposed Solution Implement the changes recommended in this CCR.
